ABOUT ME

Third-year B.Tech student specializing in Artificial Intelligence and Machine Learning with hands-on experience building AI applications using Python, Flask, LangChain, Scikit-learn, and Retrieval-Augmented Generation (RAG). Passionate about solving real-world problems through AI and continuously learning modern technologies.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning

R. C. Patel Institute of Technology

2024 – 2028

CGPA: 6.4

PROJECTS

RAG-Based PDF Chatbot :

Python • Flask • LangChain • ChromaDB • Hugging Face

- Developed an AI-powered chatbot capable of answering questions from uploaded PDF documents using Retrieval-Augmented Generation (RAG).
- Implemented hybrid retrieval using BM25 and semantic vector search to improve answer relevance.
- Built document ingestion, embedding generation, conversational memory, and source citation.
- Designed a modular backend architecture using Flask

Spam Mail Detection System :

Python • Scikit-learn • Pandas • NumPy

- Developed a machine learning model to classify spam and legitimate SMS/email messages.
- Applied text preprocessing and TF-IDF feature extraction.
- Trained and compared Naive Bayes, SVM, and Logistic Regression models.
- Evaluated model performance using Accuracy, Precision, Recall, and F1-score

TECHNICAL SKILLS

Python • JavaScript • SQL

Flask • RestAPI • Scikit-learn • LangChain

RAG • Hugging Face • ChromaDB

Git • GitHub • VS Code • Jupyter

CERTIFICATIONS

- Google AI Essentials
- Python for Everybody
- Machine Learning Fundamentals
